Tools: Git/GitHub, VS Code

PROJECTS

MUSIC ALBUMSSELLING WEBSITE | *HTML, CSS, JS, VS Code* — Sep. 2022
- Description:
  * This website is an online platform dedicated to buying and selling music albums.
  * Homepage: Displays a list of products, allows viewing product details, searching for products, and managing the shopping cart.
  * Admin: Manages products with basic CRUD functions.
  * Registration and login functionality.
  * Number of participants: 4
  * GitHub Link: https://github.com/An-HDT/demo-web-ban-Album-nhac.git
  * My Role:
    · Homepage: Display products on the homepage.
    · Admin: Create interface, handle CRUD functionality for product management.

BACKPACK SELLING WEBSITE | *HTML, CSS, JS, VS Code* — September 2022
- Description:
  * This website is an online platform specifically for buying and selling backpacks. It provides interfaces for both users and administrators.
- Homepage:
  * Displays products categorized with pagination using Ajax.
  * Shows product details.
  * Allows searching for products by name with paginated results. Advanced search includes searching by name, category, and price range, using Ajax.
  * Provides login/logout functionality with login validation using Ajax.
  * Requires registration to become a customer and make purchases.
  * Allows customers to select and purchase products and review their placed orders.
- Admin:
  * Admin interface with differentiation for logout and links for adding, editing, deleting products, and managing users.
  * Product addition includes image upload.
  * Product editing displays correct information before editing, including editing and removing images.
  * Product deletion with confirmation before deletion using JavaScript.
  * Manages customer orders, including viewing orders within a time range, viewing details of an order, and marking order status.
  * Analyzes business performance within a time range for products by category or all products.
  * Analyzes best-selling products over a time range.
- Number of Contributors: 4
- GitHub Link: https://github.com/An-HDT/demo-web-ban-balo.git
- My Role:
  * Homepage: Displays products, search, pagination.
  * Admin: Manages all content on the admin page.
